# LUVKUSH DUBEY

Software Engineer | Java • Spring Boot • Microservices • Kafka • REST APIs

+91-7247063275 · dubeyluvkush9211@gmail.com · LinkedIn · Leetcode ·

## PROFESSIONAL SUMMARY

Software Engineer with **3 years** of production experience building **Java Spring Boot microservices** , contributing to a platform serving **10,000+ active users**. Hands-on with **event-driven architecture (Apache Kafka), REST API design, JWT-based security, and cloud integrations** — delivering end-to-end features across the backend within Agile teams. Proven ability to own services from design through deployment with clean, maintainable code.

## TECHNICAL SKILLS

**Languages:** Java

**Backend:** Spring Boot, Spring Security, Spring Data JPA, Apache Kafka, Eureka Service Discovery, REST APIs, JWT, OAuth2

**Databases:** PostgreSQL, MySQL

**Architecture:** Microservices, Event-Driven Architecture, Layered Design, Repository Pattern

**Security:** JWT, OAuth2 , Spring Security

**Tools & DevOps:** Git, GitHub, Bitbucket, JIRA, SMTP (Spring Mail), Github Copilot, Claude Code, Spring AI, Azure Cloud

**Testing:** JUnit, Mockito, Unit Testing

## PROFESSIONAL EXPERIENCE

**Software Engineer** | **Mewurk Technologies** | Sept 2024 – Present (2 Years 3 month )

- Built a shift management system to handle complex employee scheduling across multiple office locations with 10+ daily shift variations and automated shift generation from attendance policies.
- Designed and implemented **Shift Management Microservice** supporting 10+ shift variations/day using **Spring Boot**, **Spring Data JPA**, and **PostgreSQL**.
- Designed and consumed **RESTful APIs** following a clean layered architecture (controller → service → repository), enforced consistent API contracts with a global **ApiResponse⟨T⟩** envelope, and applied **Spring Security** for endpoint-level access control.
- Architected **event-driven, asynchronous data pipelines using Apache Kafka**, decoupling services for resilience and scalability; configured **Eureka Service Discovery** for dynamic service registration and client-side load balancing.
- Developed **RESTful APIs** with **Spring Security** and **Spring Cloud**, routing traffic through **API Gateway** for centralized request handling.
- Contributed to the development and maintenance of an Attendance Management Service, supporting employee attendance tracking and automated attendance workflows.
- Integrated Azure Functions with Azure IoT Hub Digital Twin to support kiosk-based attendance management and device synchronization.
- Maintained code quality via **JUnit & Mockito** and led peer code reviews.

**Stack:** Java, Spring Boot, Spring Security, Kafka, Eureka, PostgreSQL, REST APIs, Azure, Bitbucket, JIRA

**Associate Software Engineer** | **Virim Infotech Pvt. Ltd.** | March 2024 – Aug 2024 (6 Months)

- Worked on a "Fresh Water System" managing technician workflows and service requests for US-based clients, delivering production-ready features from ambiguous requirements.
- Collaborated with US-based clients to gather **ambiguous requirements** and delivered production-ready features for a technician workflow management system.
- Developed **secure REST APIs** using Spring Boot, handling service requests and technician assignments across full development lifecycle.

**Stack:** Java, Spring Boot, Spring Security, PostgreSQL, REST APIs, Azure, Bitbucket, JIRA

## PROJECTS

**AI-Powered Fitness Tracker — Backend Microservices** GitHub Java · Spring Boot · Kafka · OAuth2 · MongoDB · PostgreSQL · Gemini API

- A microservices-based fitness backend that allows users to log activities and get real-time AI-powered workout recommendations.
- Built **6 microservices** (User, Activity, AI, Gateway, Eureka, Config Server) using **Java & Spring Boot**.
- Designed **API Gateway** with **Spring Cloud Gateway** + **OAuth2 JWT** for secure routing and CORS management.
- Implemented **event-driven AI analysis** using **Kafka** to trigger Google Gemini AI (Spring WebFlux) on fitness activity logging.

## ACHIEVEMENT

- **Fresher of the Year — Mewurk Technologies (2025):** Recognised for outstanding technical contributions to a production platform serving **10,000+ active users**, delivered independently within the first year as a Graduate Software Engineer.

## EDUCATION

**B.Tech in Information Technology** | Shri G.S.Institute of Technology and Science, Indore | June 2021 – June 2024
